

Appendix X: Self-binding declaration

(Version 28.02.2024)

Self-binding declaration

Providers of contracted generation grid reserve units may only use their grid reserve capacity exclusively for congestion management at the request of APG. During the chosen product/contract period, electricity market participation is inadmissible in any case pursuant to § 23b (7) ElWOG 2010.

To enable any generation units attending in the European electricity market but outside of Austria, to participate in the grid reserve tender it is necessary for the operator to state the following declaration to the national regulation authority responsible.

To:
National regulatory authority

Company according to company register:	
Company register number:	
Address (registered office):	
Post code, Town: (registered office):	

We hereby declare that if we conclude a grid reserve contract, we will make the contracted grid reserve unit(s) available for congestion management measures of APG exclusively. This applies for the entire product period. The grid reserve units will not be used for marketing on electricity markets¹ during this period.
